

In the Specification:

Please replace the Sequence Listing on pages 35-38 with the revised Sequence Listing on pages 1-3, enclosed herewith.

Please replace the paragraph on page 7, starting on line 31 with the following:

Figures 2 A-E show the construction of pGAST and pGASTK, including Seq ID Nos. 1 and 2 in Figure 2A; and Seq ID Nos. 3, 5-6 and 14, respectively, in Figure 2B.

In the Claims:

11. (Currently Amended) A fusion polypeptide comprising from the amino 5' end:
 - a) an amino acid sequence comprising ~~encoding~~ a signal peptide functional in *Aspergillus*;
 - b) an amino acid sequence comprising ~~encoding~~ a secreted polypeptide or portion thereof normally secreted from *Aspergillus*;
 - c) optionally an amino acid sequence comprising ~~encoding~~ a cleavable linker; and
 - d) an amino acid sequence comprising ~~encoding~~ a desired glycosyltransferase from which the transmembrane anchor coding region has been deleted.
12. (Original) A fusion polypeptide of Claim 11 wherein the desired glycosyltransferase is selected from the group consisting of sialyltransferase, galactosyltransferase and fucosyltransferase.

- B3
cont
13. (Original) A fusion polypeptide of Claim 11 wherein the signal peptide is selected from the group consisting of signal peptides from glucoamylase, α -amylase, and aspartyl protease from *Aspergillus* species and signal peptides from *Trichoderma* cellobiohydrolase I and II, and endoglucanase I and II.
 14. (Original) A fusion polypeptide of Claim 13 wherein the signal peptide is the signal peptide from *A. niger* var. *awamori* glucoamylase.
 15. (Original) A fusion polypeptide of Claim 11 wherein the secreted polypeptide or portion thereof is glucoamylase from *Aspergillus*.
 16. (Original) A fusion polypeptide of Claim 15 wherein the secreted polypeptide is the full length mature glucoamylase from *A. niger* var. *awamori*.
 17. (Original) A fusion polypeptide of Claim 15 wherein the secreted polypeptide is a portion comprising 50% of glucoamylase from *A. niger* var. *awamori*.
 18. (Original) A fusion polypeptide of Claim 11 wherein the signal peptide comprises the signal peptide of *A. niger* var. *awamori* glucoamylase, the secreted polypeptide or portion thereof comprises glucoamylase from *A. niger* var. *awamori*, and the desired glycosyltransferase is selected from the group consisting of sialyltransferase, galactosyltransferase and fucosyltransferase.
